

OUR PROJECT: SEISMIC DETECTION ACROSS THE SOLAR SYSTEM

Huzeyfe Çelik

Merve Çelik

We wanted to find solutions for this challenge by using algorithms and data analysis. We had ideas however we had issues on implementing them on the technical side, as we didn't have enough experience with these subjects. We plan on trying again on implementing them after we have sufficient technical skills and knowledge for solving this problem. For that reason, we accept that we failed and couldn't produce our ideas as we wished.
